TECHNICAL DATA

PROXILAB™

Oxidation Converter / Passivator

DESCRIPTION

PROXILAB is a new coating which rust into a protective coating. This new surface binds with the original metal, henceforth preventing the risk of crumbling away which occurs when the paint adheres only to the rust.

ADVANTAGES

- Destroys rust without sandblasting or brushing
- Prevents rust on all metals, (not recommended on zinc)
- Excellent protective coating for tanks and inside pipes
- Can be painted
- Very efficient against layers of sediment
- Meets ASTM A-380-99, 7.3.4 (Ferroxyl test)
- Meets ASTM DB2197-68 (adhesion paint test)

TECHNICAL DATA

PROXILAB™

Oxidation Converter / Passivator

PHYSICAL PROPERTIES

- Aqueous solution, odorless
- Safe for gaskets, washers, rubbers, plastics polymers and wood
- Alimentary grade available
- Non-flammable

DIRECTIONS

Metals require no particular treatment prior to the application of **PROXILAB**.

May be applied with a paintbrush, by vaporizer or by immersion.

If a better protection is required, coat the metals with a second layer of **PROXILAB**.

Use plastic containers.

Incompatibility Do not apply to zinc, cement (see Material Safety Data Sheet).

Availability : Case (12 x 1 litre), 10 litres, 20 litres, 55 litres and 205 litres.
